Frequently Asked Questions

1. Is PROPEL clinically proven?
PROPEL’s safety and efficacy is backed by the highest level of clinical evidence. Over 100,000 people have been treated with PROPEL.

2. Will I feel PROPEL in my sinus?
PROPEL is lightweight and usually cannot be felt once in place.

3. What should I do after the procedure?
Always follow your doctor’s instructions. Frequent saline irrigations are important for post-surgical healing.

Hear What Others Are Saying at MySinusitis.com/stories

“I could breathe. There was no stuffiness. The recovery was just a few days.” – Tammy

“I haven’t had a sinus infection since I had the procedure done. I breathe better. I’m able to exercise more.” – Michael

Results vary. See back cover for information on benefits and risks.
Sinus surgery with PROPEL is clinically proven to provide relief by targeting inflammation, the primary characteristic of chronic sinusitis.

Don’t Just Treat the Symptoms. Treat the Source.

If you and your physician have discussed sinus surgery, be assured that it is easier and less invasive than ever before.

Small instruments are introduced through the nostrils to open sinuses blocked by inflammation.

Uncomfortable gauze packing is a thing of the past.

PROPEL is placed in the sinus after surgery to promote healing and reduce the need for additional procedures.

Ask your doctor if sinus surgery with the PROPEL sinus stent is right for you.
